I'm a Product Designer driven by craft, clarity, and curiosity. I love making complex experiences feel simple, experimenting with new tools, and using AI to move faster, explore more, and build better.

Experience

Product Designer III–Olympus
Jan 2024-Present

I design clinical analytics tools and make complex healthcare workflows feel clear, scalable, and trustworthy. I work closely with product, engineering, and data teams, with a strong focus on patient safety and care.

UX Designer IV–eero (Amazon)
Aug 2022-Aug 2023

I made technical hardware workflows easier to understand and worked on design systems across web and mobile, creating more consistent, scalable experiences. I also improved visual clarity through iconography.

UX Designer–Microsoft365
Jun 2019-Aug 2022

I led design for cloud collaboration across web, desktop, and mobile, making permissions and file-sharing workflows simpler for millions of users. My work helped drive a 34% increase in daily sharing completion.

Education

University of Washington, BD
Interaction Design, Informatics, 2019

LW Tech, AAS
Multimedia Design, 2016

Expertise

Data visualization, Interaction design, Design systems, Accessible design, User interviews and synthesis, Low-fidelity concept testing, High-fidelity usability testing, Qualitative and Quantitative research.
